

Uninstall or remove SafeZone browser from Avast

1. Open Control Panel, click on Programs > Programs and Features
2. Select Avast Internet Security or Avast AV, click **Change**
3. Click on 'Change', once which components do you want to install screen appears, Uncheck **SafeZone Browser** and click on 'Change'

Wait for the Avast to make the changes you've requested, when you're prompted to restart your computer to remove SafeZone Browser, do so.

Note: [Avast Free Antivirus 2016](#) doesn't include SafeZone browser.

So next time when you install Avast, don't forget to uncheck the install of unnecessary components such as [Secureline VPN](#), [Avast Passwords](#), [Cleanup](#) including the SafeZone browser component.
